

Privacy Policy

Effective August 31, 2026

1. Overview

This policy explains what information Quantex collects, why, and how it is stored, for anyone who creates a Quantex account.

2. Information We Collect

Quantex collects the following categories of information:

- Account information: your email address, and either a password or a Google account identifier if you sign in with Google.
- Identity verification documents: a government-issued ID (front and back) and a selfie, submitted only when you choose to make your first withdrawal.
- Transaction data: deposits, withdrawals, bot configurations, and trading activity within your account.
- Basic technical data: standard information your browser sends to any website you visit, such as IP address and browser type.

3. How We Use Your Information

Quantex uses this information to operate your account: crediting deposits, running the bots you configure, processing withdrawals, reviewing identity verification submissions, sending you transactional emails and browser notifications (deposit confirmed, withdrawal approved, bot paused, KYC approved or rejected), and responding to support requests. Quantex does not sell your personal information.

4. How Identity Documents Are Stored

ID documents and selfies are stored in a private, access-restricted storage bucket, separate from your regular account data. Only the review team can access them, through short-lived signed links generated at review time. They are not shared with Binance, which Quantex trades on, since trading runs from a single pooled account rather than one connected per user.

5. Service Providers

Quantex relies on a small number of service providers to operate: a database and authentication provider, an email provider for transactional messages, and Binance, used for trade execution. These providers only receive the information needed to perform their specific function.

6. Data Retention

Account and transaction data is kept for as long as your account is active and for a reasonable period after, to resolve disputes and meet basic recordkeeping needs. Identity documents are retained only as long as needed for the purpose they were collected for.

7. Your Choices

You can update your account details in-app, and can ask Quantex to close your account and delete data that Quantex is not otherwise required to keep, by contacting support.

8. Security

Binance API keys used to trade on your behalf are configured for trading only and can never withdraw funds. Withdrawals from Quantex itself require identity verification before they can be requested. No method of storing or transmitting data is 100% secure, and Quantex cannot guarantee absolute security.

9. Children

Quantex is not directed at, and does not knowingly collect information from, anyone under 18.

10. Changes to This Policy

Quantex may update this policy from time to time. Material changes will be reflected by updating the effective date above.

11. Contact

Questions about this policy can be sent to support@onquantex.com.
